

SDRW-08V1M-U Bridge Board FW update SOP

Step 1: Connect a Windows PC to the SDRW-08V1M-U using a wired connection.

Step 2: Double-click the file "ASUS_235xFWUpd3240_200416514C02_V1.exe" to initiate the firmware upgrade process.

Step 3: Once you've double-clicked the program, refrain from switching screens or running other applications on your computer. Simply wait until the program finishes.

Step 4: When you see the screens below displaying a success message, the firmware upgrade process is complete.
